

Alain Vanhecke

Senior Technical Specialist, Pall Biotech

Alain Vanhecke is a senior technical specialist for Pall Biotech based in Hoegaarden, Belgium. With over 33 years of experience in the bioprocessing industry, Alain is a critical driver of the extensive support program Pall provides for customers. He is responsible for multiple facets of integrating the bioprocess portfolio with scientific and laboratory services, including process development for strategic accounts and consulting for the design and implementation of single-use technologies in the European and Western regions.

Before joining Pall about two decades ago, Alain was with SOCOMER SA, where he started out as account manager prior to managing the filtration laboratory for their biopharm and food and beverage divisions.

Alain Vanhecke received a master's in Biochemistry and Biotechnology from Université catholique de Louvain-La-Neuve. He is active in the industry, maintaining memberships with the Parenteral Drug Association, ISPE and Bio-Process Systems Alliance (BPSA), presenting in international conferences and coauthored in a recognized scientific publication.
